

# Ganymede API

## Overview

The Ganymede API implements all functionality necessary for working with Ganymede. It is used internally by various components to getting and reporting status information. It can be used by 3rd party systems to configure and get reports of activity.

## Agent API

[/agent](#) (GET and POST implemented)

[/agent/<agent\\_id>](#) (GET and DELETE, POST implemented)

[/agent/<agent\\_id>/log](#) (GET and POST implemented)

[/agent/<agent\\_id>/log/<transaction\\_id>](#) (GET and POST implemented)

[/agent/<agent\\_id>/transfer/<transaction\\_id>](#) (POST implemented)

[/agent/<agent\\_id>/assign](#) (POST implemented)

## Worker API

[/worker/<transaction\\_id>](#) (POST implemented)

[/worker/log/<transaction\\_id>](#) (POST implemented)

## Utility API
