

/worker/<transaction_id>

Overview

The /worker/<transaction_id> call is used to create and remove schemas used for transaction processing by Workers.

POST /worker/<transaction_id>

This call will either create a new schema based on the transaction id or delete the schema associated with the transaction id.

Request

Parameters:

- action - (string, required) either CREATE or DESTROY, as the case requires

Response

Headers

Status:

- 200 OK - API was successful
